The Lefkadia Valley is a new protected appellation in the Krasnodar region. Our Protected Designation of Origin "Lefkadia Valley" vineyards are located on the foothills of the Caucasus Mountains. Separated from the warmth of the sea by two mountain ranges, these vineyards are on the frontier of our grape-growing region. The local climate of contrasting diurnal and nocturnal temperatures adds complexity to the aroma of wines produced here since more than a century. The variety of soil types – from limestone to red clay – allow us to produce completely different wines in style and character.

Grapes are harvested by hand in 10 kilogram boxes and due to the close location of the winery and vineyards, they get to the winery in perfect condition. We use many different types of fermenters: concrete, clay, oak and steel tanks – all allow us to experiment with the terroir and its ancient roots. The winery has always been managed by the Nicolae family and our wonderful wines are crafted by a world-renowned team of experts in viticulture and winemaking.

With great pleasure we invite you to try our wines proudly made in the Lefkadia Valley PDO.

LEFKADIA VALLEY PDO
SUITABLE LANDS
CURRENTLY PLANTED

- Likira
- Sauk-Dere, Likira
- Sparganere Likira
